# Framework to Think about Social & Environmental Impacts

| | Avoiding Negative Impacts | Creating Positive Impacts |
|---|---|---|
| Your Suppliers | | |
| Your Business & Local Community | | |
| Your customers or downstream users | | |

**Your Supply Chain**
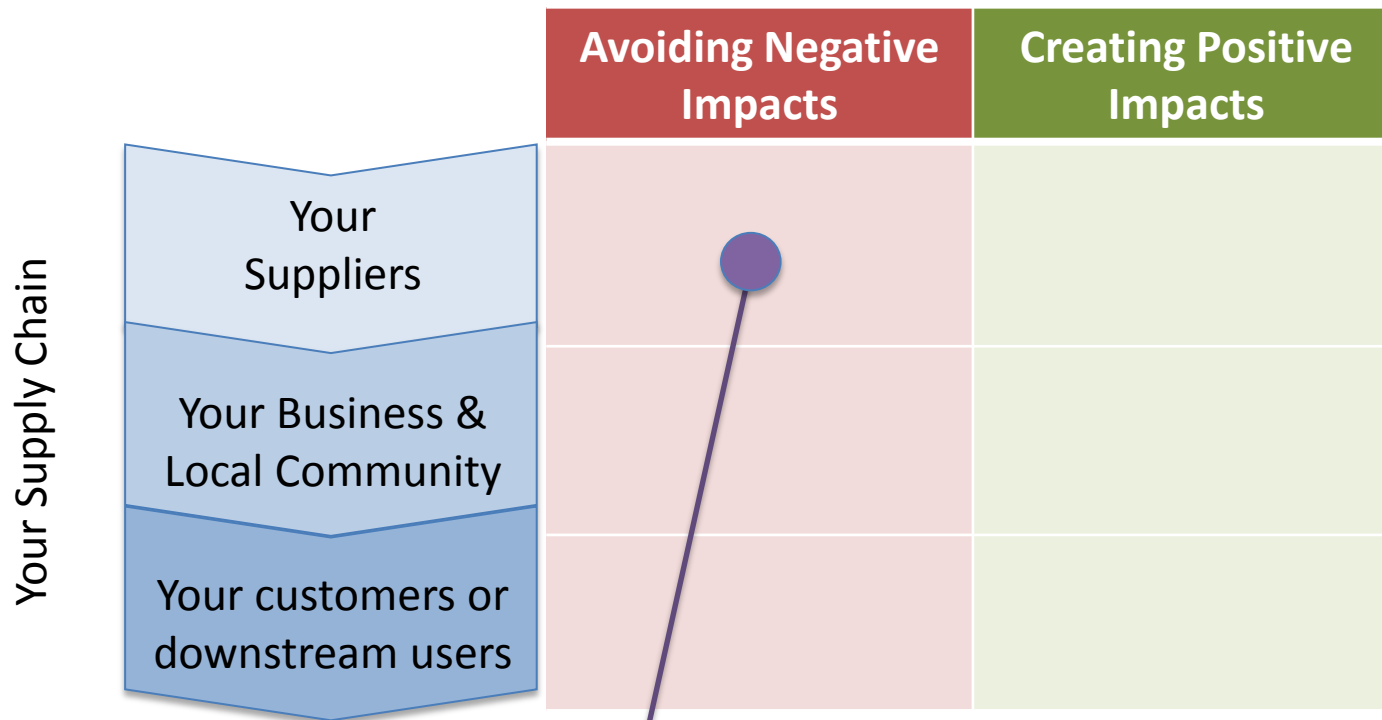

For each area, think about:

1. Identify: What are the possible impacts? Which are you targeting?
2. Manage: What processes are/can be put in place to manage these?
3. Measure & Report: How will you know it is working? Who will you tell?
