Tour the Shellfish Research Hatchery at UNCW

April 24, 2019 @ 3 pm

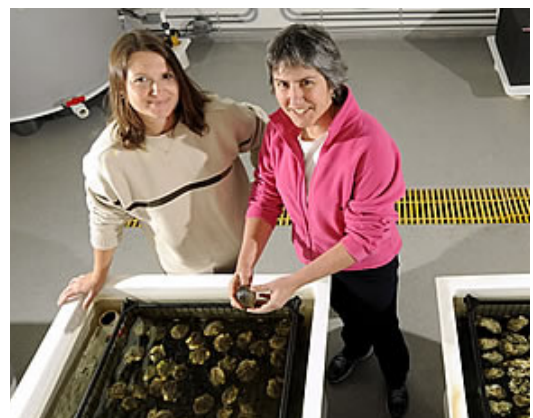

Just before the
4-7pm Pitch Session

- **Learn about how innovation is contributing to aquaculture growth in the region.**
- **Ask questions of the facilities leaders and scientists.**
- **Meet fellow experts and innovators.**

The UNCW Shellfish Research Hatchery, in operation since 2011, conducts research to both inform and contribute to North Carolina's efforts to restore declining populations of ecologically and commercially important shellfish, and to build a sustainable shellfish aquaculture industry.

See the facilities including:

- Microalgal culture facility designed to produce approx. 4,000 liters per day
- Wet and dry support labs
- Quarantine hatchery for work on non-local species
- Seawater system capable of delivering 100GPM of filtered and temperature controlled seawater
- ~2-acre aquaculture demonstration site for research on grow-out strategies

**LOCATION: Hatchery Building, CREST Research Park,
5606 Marvin K Moss Lane, Wilmington NC 28409**

Please RSVP to Cole Mellino: cole@fish20.org
