

Coming to the Fish 2.0 Aquaculture event in Ocean Springs, Mississippi?

JOIN US FOR A TOUR OF Thad Cochran Marine Aquaculture Center at the University of Southern Mississippi.

Workshop Participants: February 11, 2018 @ 3 pm

FISH 2.0 Pitching event guests: February 13, 2018 @ 2 pm
(just before the pitching event)

Visit and learn about Aquaculture and Genetics first-hand

TCMAC is an advanced research unit at the University of Southern Mississippi. The Center works with industry, government and non-profit organizations to advance sustainable aquaculture.

Facilities include:

- Culture space for animals and live feeds
- Experimental space for disease, nutrition, and genetics/reproductive physiology research.
- Isolated small-, medium-, and large-scale systems with single-pass climate control.

What will you see?

We will tour broodstock, hatchery, nursery and growout facilities that employ artificial seawater and recirculating aquaculture systems to produce marine species including finfish, crustaceans, molluscan shellfish, and algae.

We will also discuss aquatic health, genetics, larviculture, reproductive physiology and live feeds issues, innovations and trends.

Please RSVP to Cole Mellino: cole@fish20.org
